The first wool Auction of the New Year had 8187 bales on offer with an even mix of Lambs, second shear and full fleece. Fine Lambs of 27 micron were keenly sort after with 28 micron selling well and any stronger Lambs harder to gain much traction. Any wool with a veg matter reading of .3% or greater were difficult to move along with wools of poor colour. Kells wool had a clearance of 90% today and we start back on weekly sales with online Auction fortnightly.
